## Section 1 - Basic Instructions

### 1 X12 and HIPAA Compliance Checking, and Business Edits

EDI interchanges submitted to Anthem for processing pass through compliance edits. 5010 acknowledgments and reports for accepted/rejected files will be placed in the submitter's trading partner mailbox for pickup.

- **TA1 Interchange Acknowledgment.** Anthem returns TA1 X12 and proprietary reports to the submitter of inbound 820 files containing envelope errors in the ISA and GS segments.
- **Level 1.** Anthem returns a 999 Interchange Acknowledgment to the submitter for every inbound transaction received. Each transaction passes through edits to ensure that it is X12 compliant. If the X12 syntax or any other aspect of the 820 is not X12 compliant, the 999 will also report the Level 1 errors in AK segments and indicate that the entire transaction set has been rejected.
- **Level 2.** In addition to HIPAA TR3 edits, Anthem applies business edits to ensure that the necessary information is populated and complete for efficient processing. When encountering HIPAA compliance, code set or business errors, Anthem returns an 864 Level 2 Status Report to the submitter indicating the entire transaction set has been rejected.

### 2 Uppercase Letters, Special Characters, and Delimiters

As specified in the TR3, the basic characters set includes uppercase letters, digits, space and other special characters.

- All HIPAA deemed values (segments, qualifiers) must be submitted in UPPERCASE letters only.
- Suggested delimiters for the transaction are assigned as part of the trading partner set up. E-Solutions Representative will discuss options with trading partners, if applicable.

| Inbound Delimiters     |                 |          |
|------------------------|-----------------|----------|
|                        | Suggested Value |          |
| Data Element Separator | *               | Asterisk |
| Sub-Element Separator  | :               | Colon    |
| Segment Terminator     | ~               | Tilde    |
| Repetition Separator   | ^               | Caret    |

- To avoid syntax errors, hyphens, parentheses, and spaces are not recommended to be used in values for identifiers.
- Anthem encourages trading partners to not use the following special characters as part of the value: asterisk (\*), less than/greater than signs (<, >), colon (:), and slash (/). This minimizes risk for a special character to be recognized as a delimiter.

Example: Tax ID '98-7654321'. Although a hyphen (-) is a valid special character, it adversely affects processing since the system is unable to process correctly.

### 3 Decimal "R" Data Elements

"R" data elements are those that contain a decimal point; involving monetary amounts, units, visits, weights, and frequency. Anthem recommends using decimal points for monetary amounts, and whole numbers for other types of "R" data elements.

### 4 Social Security Number

Unless requested, do not send the social security number referenced in the following segments

- Loop 2000B ENT03 Individual Remittance
- Loop 2100B NM108 Individual Name

## Section 2 – Enveloping and File Submission

EDI envelopes control and track communications between you and Anthem. One envelope may contain many transaction sets grouped into the following:

- Interchange Control Header (ISA)
- Functional Group Header (GS)
- Functional Group Trailer (GE)
- Interchange Control Trailer (IEA)

#### NOTE. Critical Batching and Editing Information

\*Transactions must be batched in separate functional group by GS03.

\*Unique group control number (GS06) MUST NOT be duplicated within 365 days by Trading Partner ID (GS02); files containing duplicate or previously received group control numbers will be rejected.

## Section 3 - Charts for Situational Rules

Listed below are loops, segments, and data elements required for processing by Anthem per the situational rules in the 820 TR3.
