

837D

837 Dental Health Care Claim

This companion document is for informational purposes only to describe certain aspects and expectations regarding the transaction and is not a complete guide. The details contained in this document are supplemental and should be used in conjunction with the ASC X12 Standards for Electronic Data Interchange Technical Report Type 3 (TR3) as published by the Washington Publishing Company.

Section 1 – 837D Dental Health Care Claim: Basic Instructions

Section 2 – 837D Dental Health Care Claim: Enveloping

Section 3 – 837D Dental Health Care Claim: Charts for Situational Rules

NOTE: Anthem has designated Availity to operate and serve as Anthem's EDI Gateway (entry point) as a no-cost option to our Trading Partners.

Get Started With Availity

The Availity Quick Start Guide will assist you with any EDI connection questions.

If you're a provider and wish to use a Clearinghouse or Billing company, please work with them to ensure connectivity.

Need Assistance?

For questions about signing up, contact Availity Client Services 1-800-AVAILITY (1-800-282-4548) or visit www.availity.com

Section 1 - Basic Instructions

1 X12 and HIPAA Compliance Checking, and Business Edits

EDI interchanges submitted to Anthem for processing pass through compliance edits. 5010 acknowledgments and reports for accepted/rejected files will be returned to the trading partner for pickup using the reporting method established at Availity.

- TA1 Interchange Acknowledgment. Anthem returns TA1 X12 and proprietary reports to the submitter of inbound 837 files containing envelope errors in the ISA and GS segments.
- Level 1. Immediate Batch Report (IBR). Anthem returns a 999 Interchange Acknowledgment to the submitter for every inbound 837 transaction received. If the X12 syntax or any other aspect of the 837 is not X12 compliant, the Immediate Batch Report/999 will also report the Level 1 errors in AK segments and indicate that the entire transaction set has been rejected.
- Level 2. In addition to HIPAA TR3 edits, Anthem applies business edits to ensure that the necessary information is populated and complete for efficient processing. When encountering HIPAA compliance (including balancing), code set or business errors, Anthem returns details that identify these errors to the Trading Partner in the: 1) Electronic Batch Report (EBR) and 2) Delayed Payer Report (DPR) listing which claim(s) have failed. These reports are formatted based on the settings the trading partner chooses at Availity. Review the <u>Availity EDI Guide</u> for more information on report formatting options.

2 HIPAA Compliant Codes

Use HIPAA-compliant codes from current versions of the following:

- Physician's Current Dental Terminology (CDT)
- Health Care Financing Administration Common Procedural Coding System (HCPCS)
- International Classification of Diseases Clinical Mod (ICD-10-CM) Clinical Modification
- International Classification of Diseases Clinical Mod (ICD-10-PCS) Procedure Coding System
- Provider Taxonomy Codes

3 Diagnosis Codes

According to the 837D TR3, a transaction is not X12 compliant if decimal points are used in diagnosis codes. Therefore, should a diagnosis code contain a decimal point, Anthem will return an Immediate Batch Report/999 to the submitter indicating that the transaction has been rejected.

4 Procedure Codes and Modifiers

All valid CDT and HCPCS codes and modifiers are accepted for claim adjudication. Refer to your billing guidelines or provider contract for submission of these codes. If submitted codes are invalid, an Electronic Batch Report and/or a Delayed Payer Report will be returned to the submitter identifying which claim(s) have failed.

5 Uppercase Letters, Special Characters, and Delimiters

As specified in the TR3, the basic character set includes uppercase letters, digits, space, and other special characters.

- All alpha characters must be submitted in UPPERCASE letters only.
- Suggested delimiters for the transaction are assigned as part of the trading partner set up.
 - Data Element Separator, Asterisk (*)
 - Repetition Separator (ISA11), Caret (^)
 - Sub-Element Separator, Colon (:)
 - Segment Terminator, Tilde (~)
- To avoid syntax errors, hyphens, parentheses and spaces are not recommended to be used in values for identifiers.

Examples: Recommended: Zip Code 123456789 Medical Record # 1234567

• Since originally submitted values may be returned on outbound transactions, Anthem encourages trading partners to not use the following special characters as part of the value: asterisk (*), less than/greater than signs (<, >), colon (:), and slash (/). This minimizes the risk for a special character to be recognized as a delimiter.

Example: Provider assigns a Patient Control Number '12*3456789'. Although an asterisk (*) is a valid special character, it adversely affects processing since it is also a common delimiter. The value '12*3456789' may process incorrectly as two separate values '12' and '3456789'.

6 Decimal "R" Data Element Types

"R" data element types contain a decimal point; involving monetary amounts, units, visits, weights, and frequency. Anthem recommends using decimal points for monetary amounts, and whole numbers for other types of "R" data elements. Except for monetary amounts, if "R" data element type includes a decimal and numbers after the decimal, Anthem adjudicates the claim based on the whole number. Numbers after the decimal will not be considered.

7 Numeric Values, Monetary Amounts and Units

- Anthem pays all claims in US dollars and therefore, accepts monetary amounts in US dollars only. If codes related to foreign currencies are used, then an Electronic Batch Report and/or a Delayed Payer Report will be returned to the submitter identifying which claim(s) have failed.
- Anthem recognizes units in whole numbers only.
- Anthem recognizes units in values of less than 9999 and greater than or equal to zero.
- If a negative service line charge (SV302) or negative units (SV306) are used, then an Electronic Batch Report and/or Delayed Payer Report will be returned to the submitter identifying which claim(s) have failed.

8 Address Information

- P.O. mailboxes / Lock Boxes are not allowed in the Billing Provider loop. If submitted in the Billing Provider loop, an Electronic Batch Report and/or Delayed Payer Report will be returned to the submitter identifying which claim(s) have failed.
- The Pay-to Address loop does support P.O. Box / Lock Box addresses. Therefore, if payment is expected to be remitted to a P.O. Box / Lock Box, submit the P.O. Box / Lock Box address.

• Full 9-digit zip codes are required in the Billing Provider and Service Facility Location loops. If 5-digit zip codes are used in these loops, an Electronic Batch Report and/or Delayed Payer Report will be returned to the submitter identifying which claim(s) have failed.

9 Taxonomy Codes (PRV)

The Healthcare Provider Taxonomy code set divides health care providers into hierarchical groupings by type, classification, and specialization, and assigns a code to each grouping. The Taxonomy consists of two parts: individuals (e.g., physicians) and non-individuals (e.g., ambulatory health care facilities). All codes are 10-alphanumeric positions in length. Health care providers select the taxonomy code(s) that most closely represents their education, license, or certification. If a health care provider has more than one taxonomy code associated with it, a health plan may prefer that the health care provider use one over another when submitting claims for certain services.

It is strongly recommended that the taxonomy be populated in PRV segments for all applicable claims that you are filing. Refer to the CMS website for a listing of codes, www.wpc-edi.com/taxonomy.

10 Coordination of Benefits

Specific 837 data elements work together to coordinate benefits between Anthem and Medicare or other carriers. Following the Provider-to-Payer-to-Provider model;

- The provider sends the 837 to the primary payer.
- The primary payer adjudicates the claim and sends an 835 Payment Advice to the provider. The 835 includes the claim adjustment reason code and/or remark code for the claim.
- Upon receipt of the 835, the provider sends a second 837 with COB information populated in Loops 2320, 2330A-H, and/or 2430 to the secondary payer. The secondary payer adjudicates the claim and sends an 835 Payment Advice to the provider.

Anthem recognizes submission of an 837 transaction to a sequential payer populated with data from the previous payer's 835. Based on the information provided and the level of policy, the claim will be adjudicated without the paper copy of the Explanation of Benefits from Medicare or the primary carrier.

When more than one payer is involved on a claim, data elements for all prior payers must be present (i.e., if a tertiary payer is involved, then all the data elements from the primary and secondary payers must also be present).

If data elements from previous payer(s) are omitted, Anthem will fail the particular claim.

Since 5010 has made changes to COB reporting, Anthem strongly encourages in-depth review of TR3 front matter. Anthem adjudicates and pays dental services at the line level. Therefore, when Anthem has any payment position other then primary, line level payments (SVD02), and line level adjustments (CAS), must be conveyed, when known by the submitter.

*Explanation of Benefits (EOB) (PWK01=EB) is required when submitting COB claims.

Anthem will set claims to automatically suspend for further review if the PWK or COB data elements are populated. If the supporting documentation (EOB) is not received within 7 calendar days, Anthem may deny the claim.

11 Claim and COB Balancing

For COB claims, balancing is performed at both claim and service line on the payment charges for each payer. If not balanced, EBR and/or DPR reports will be returned to the submitter identifying which claim(s) have failed.

- Loop 2300 CLM02 (Total Claim Charge) must equal the sum of Loop 2400 SV302 (Line Item Charge).
- Loop 2320 AMT02 (COB Payer Paid Amount) must equal the sum of Loop 2430 SVD02 (Line Adjudication Information) less the sum of Loop 2300 CAS (Claim Level Adjustments).
- Loop 2400 SV302 (Line Item Charge Amount) must equal the sum of Loop 2430 SVD02 (Line Adjudication Information) plus the sum of Loop 2430 CAS (Claim Level Adjustments).

12 Preparing and Sending Attachments to Support a Claim (Loop 2300 PWK)

Loop 2300 PWK segment is required when documentation (attachments) support a claim.

- A) Sending attachment(s) electronically (PWK02=EL) with National Electronic Attachment, Inc. (NEA) Many providers use NEA to transmit attachments (x-rays, lab reports, primary EOBs, narratives, periocharts and other chart notes) in support of claims submitted electronically.
 - Contact NEA by accessing their site at www.nea-fast.com.
 - Populate the NEA assigned Attachment Control Number (PWK06) in the electronic claim.
- B) Sending attachment(s) by mail (PWK02=BM); completing the Attachment Face Sheet
 - Create unique Attachment Control Number (PWK06) for each attachment as recommended in chart below.
 - Mail the attachment(s) the day the claim is submitted. *Addresses at bottom of Attachment Face Sheet (see next page)
 - Do not send unnecessary attachments (i.e., copy of the member's ID card).
 - Ensure claim and attachment matches based on the Attachment Control Number (PWK06), or the claim may be denied.
 - Ensure that the same Attachment Control Number (PWK06) is used for multiple attachments supporting a single claim.
 - Ensure all information is legible to avoid processing delays.
 - If claim with supporting documentation is rejected, correct the claim using the same Attachment Control Number (PWK06). Anthem will hold the attachment and match the claim once it is received. However, if a new Attachment Control Number is assigned, supporting documentation referencing the new Attachment Control Number will need to be submitted.

Attachment Control #	411056789RF or	C11056789BE

Position #	Example	Definition
1	A or C	Represents the type of claim associated with the attachment
		A = non-COB claim C = COB claim
2-5	1105	Represents the date the claim was submitted electronically.
		Date = 11/05/2004, enter 1105
6-9	6789	Represents the last four digits of the submitted Member ID#.
		Member ID = 123456789, enter 6789
10-11	BE	Represents the first two letters of the patient's first name.
		Patient Name = Betty, enter BE

DENTAL Attachment Face Sheet Loop 2300 PWK Claim Supplemental Information

The paper documentation included in this mailing supports the electronically submitted claim.

If the correspondence is not received in 7 calendar days and is necessary for adjudication, the claim may be denied. After 7 calendar days, the claim will be reviewed on an inquiry basis only.

13 Sending Electronic Attachments to Support a Claim

The 275 Companion Document (from www.anthem.com/edi, EDI Companion Guide) assists with specific attachment requirements and enables providers to electronically submit attachments based on their business needs.

When attachments are sent electronically (PWK02 = EL) but transmitted in an X12 275 rather than by paper, PWK06 is used to identify the attached electronic documentation. The number in PWK06 of the 837 claim is carried in the TRN segment of the 275 attachment transaction.

(1) Unsolicited

When the provider knows that the payer requires additional information to process the claim

- Provider sends additional information when submitting the claim
- Provider sends the 837 claim with the Loop 2300 PWK segment:
 - PWK02 = EL (electronically only)
 - PWK05 = AC (Identification Code Qualifier); required if PWK02 = EL
 - PWK06 = Identification Code (Attachment Control #) assigned by the provider or their clearinghouse vendor
- Provider then sends the 275 attachment transaction (TRN02 = Attachment Control #)

Provider PWK06 Attachment Control # is the key to unsolicited transaction matching

When the attachment is unsolicited the Attachment Control # = X12 837 PWK06 = X12 275 TRN02

(2) Solicited

When the payer requests additional information from the provider to process a claim

- Provider sends a claim.
- When Anthem determines not enough information exists to process the claim, Anthem sends letter request for the additional information.
- Provider uses the X12 275 to respond to the letter request

Anthem Attachment Control # (Claim Number) is the key to solicited transaction matching.

- When the attachment is solicited, the Attachment Control # (Claim Number) is in both the Anthem request and the Provider Attachment response (X12 275 TRN02)
- The Attachment Control # (Claim Number) is assigned by Anthem

14 Social Security Number

Unless requested, do not send Social Security Number in the following of the 837 TR3:

- Loop 2010AA REF Billing Provider Tax Identification
- Loop 2010BA NM1 Subscriber Name
- Loop 2010BA REF Subscriber Name
- Loop 2330A NM1 Other Subscriber Name
- Loop 2330A REF Other Subscriber Secondary Identification

Section 2 - Enveloping

EDI envelopes control and track communications between you and Anthem. One envelope may contain many transaction sets grouped into the following:

- Interchange Control Header (ISA)
- Functional Group Header (GS)

- Functional Group Trailer (GE)
- Interchange Control Trailer (IEA)

Anthem has designated Availity to operate and serve as Anthem's EDI Gateway (entry point) as a no-cost option to our Trading Partners. Availity has specific requirements that must be adhered to and should be reviewed in order to ensure transactions are accepted, processed and ultimately delivered to Anthem.

For more information on submitting claims and the required ISA and GS envelope values, review the following topics in the <u>Availity EDI Guide</u>.

- Uploading and downloading EDI files
- Control Segments/Envelopes
- FTP Client Confirmation
- Acknowledgements and Reports

Section 3 - Charts for Situational Rules

Listed below are loops, segments, and data elements required for proper adjudication by Anthem per the situational rules in the 837D TR3.
